

# Morrow's Pathway and Underpass

The pathway will interconnect with a proposed rail station and a city-wide path system. The vision for the path system is to create a link between local residential neighborhoods and the downtown business district. It won't be long before you can walk under Hwy 54 using the new bicycle and pedestrian underpass.

This project was funded with Stimulus dollars and will be an important piece in realizing Morrow's vision of offering the community a complete system of pedestrian and bike trails.

What an amazing opportunity to move in and around the city without getting into your car. We hope to see citizens, students and visitors choosing the path system as a means to access services and destinations.
